Box Patent Application
Commissioner for Patents
Washington, D.C. 20231

Re:	Applicant:	Infineon Technologies, AG
	Serial No:	09/870321
	English Title:	Method and arrangement for taking up a first medium, which is present in a first phase, into a capillary device
	Attorney Docket No:	32226.4

Dear Sir:

Enclosed for filing please find the following:

1. Preliminary Amendment; and
2. A self-addressed stamped post card to return to us acknowledging receipt of the enclosed document.

It is my understanding that there is no fee required for this filing. If that understanding is incorrect, the Commissioner is hereby authorized to charge any payment of the required fees to Deposit Account No. 02-3732. This filing is associated with Briggs and Morgan's customer number 32300.

Very truly yours,

Jeffrey R. Stone

Re: U.S. Patent Application 09/870321) PATENT

German Title: Verfahren und Anordnung zum Aufnehmen)
eines ersten Mediums, welches in einer)
ersten Phase vorliegt, in eine)
Kapillarvorrichtung)

English Translation: Method and arrangement for taking up a)
first medium, which is present in a first)
phase, into a capillary device)

Applicant: Infineon Technologies, AG)

Inventors: Volker Lehmann)

Attorney Docket No: 32226.4)

Honorable Commissioner of Patents and Trademarks
Washington, D.C. 20231

Sir:

PRELIMINARY AMENDMENT

In the above-entitled patent application, please amend the application as follows:

In the Claims

- 1 1. (amended) Method for taking up a first medium, which is present in a first phase,
2 into a capillary device, in which the first medium is taken up into the capillary device by means
3 of a reduced pressure which is produced in the ⁷latter, wherein the reduced pressure which is
4 produced is controlled in such a way that it is less than a critical pressure such that, if it is
5 exerted in the capillary device, a surface tension which is produced by the first medium or a
6 second medium in the capillary device, when the first medium has been taken up fully by the
7 capillary device, would be overcome so that the second medium which is present in a second
8 phase which is different from the first phase, would be taken up into the capillary device.
